	Recommendation			
	Date of results	, 20	Physician	License No.
			Name of doctor	(signature)

### Results of Lung Cancer Screening

- ※ (Health insurance subscriber) If the physician documents necessity of medical care in an advanced general hospital on the Results of Medical Checkup form, this form substitutes the request of medical care (request of medical exam). Presenting this form is sufficient to schedule a medical exam at an advanced general hospital.
- ※ (Medical care assistance recipient) If an abnormality is found as a result of the health checkup and the doctor's impression written in the checkup report as further evaluation is required, the report can be used as a referral for the subject to be treated at the same institution. In case you need another kind of medical care assistance than the given case, you should be treated according to the process of medical care assistance, Article 3, "Enforcement Rule of the Medical Care Assistance Act." In case of a subject applicable to the elective medical care institution system, he/she should first be treated at the medical institution that he/she has chosen.
- ※ Even if an abnormal finding is not made in the result of lung cancer examination, patients must receive regular examinations, and if the patients are currently smokers, they must quit smoking to prevent the occurrence of lung cancer. If experiencing symptoms that are suspected to be of lung cancer after an examination (weight loss, hemoptysis, sudden shortness of breath), patients are advised to consult their physicians immediately.
- ※ Examinees who are registered for special cases of cancer benefit estimation can postpone their lung cancer examinations until the period of special benefit estimation expires.
- ※ Patients can receive consultation on their lung cancer examination results and for smoking cessation (post-examination consultation) at medical institutions where they received the examination.
- ※ Among those who have been diagnosed with lung cancer, patients who meet the relevant condition (health insurance premium, national cancer screening, etc.) can be eligible for cancer patient medical expense support. (Contact your local health center for details.)
